

Sound & Energy Transfer

Presentation

Hi everyone, here are the results for my groups String Cup Experiment.

We found that...

combination D, paper cups with
a bungee cord medium that is
taut

...is the best for communication.

And we found that...

combination 1, plastic cups with a bungee cord medium that is loose

... is the worst for communication.

Other observations. (Extra information,
details, discoveries)

In conclusion...

**we found that paper cups vibrate
the best to produce sound.**

Other observations. (Extra information, details, discoveries) Continued

We also found that a **thick solid medium that is taut** is best for sound waves to travel.

Thank you for listening.

Remember!

- Big voice.
- Eye contact.
- Body Language.
